5 CRITICAL PROBLEMS HOLDING YOU BACK

1

INVISIBLE IN SEARCH

0 of 664 videos found in 225 niche search results. Titles are brand-centric instead of keyword-rich. YouTube can't recommend what it can't categorize.

2

ENGAGEMENT DECLINING YEAR OVER YEAR

3.8% (2022) -> 3.4% (2023) -> 2.2% (2024) -> 1.9% (2025) -> 1.5% (2026). Algorithm is deprioritizing your content.

3

PUBLISHING TOO MUCH, TOO THIN

9.6 videos/week averaging 666 views = 6,400 weekly views. 3 quality videos at 5,000 each = 15,000 weekly views with 70% less effort.

4

TAGS ARE COPY-PASTED

513 of 664 videos use identical generic tags ('success', 'health', 'wealth', 'values'). These tell the algorithm nothing about specific content.

5

B2B CONTENT KILLS PERFORMANCE

Tax firm content averages 20-90 views. Your audience is business owners, not CPAs. B2B content should live on a separate channel.

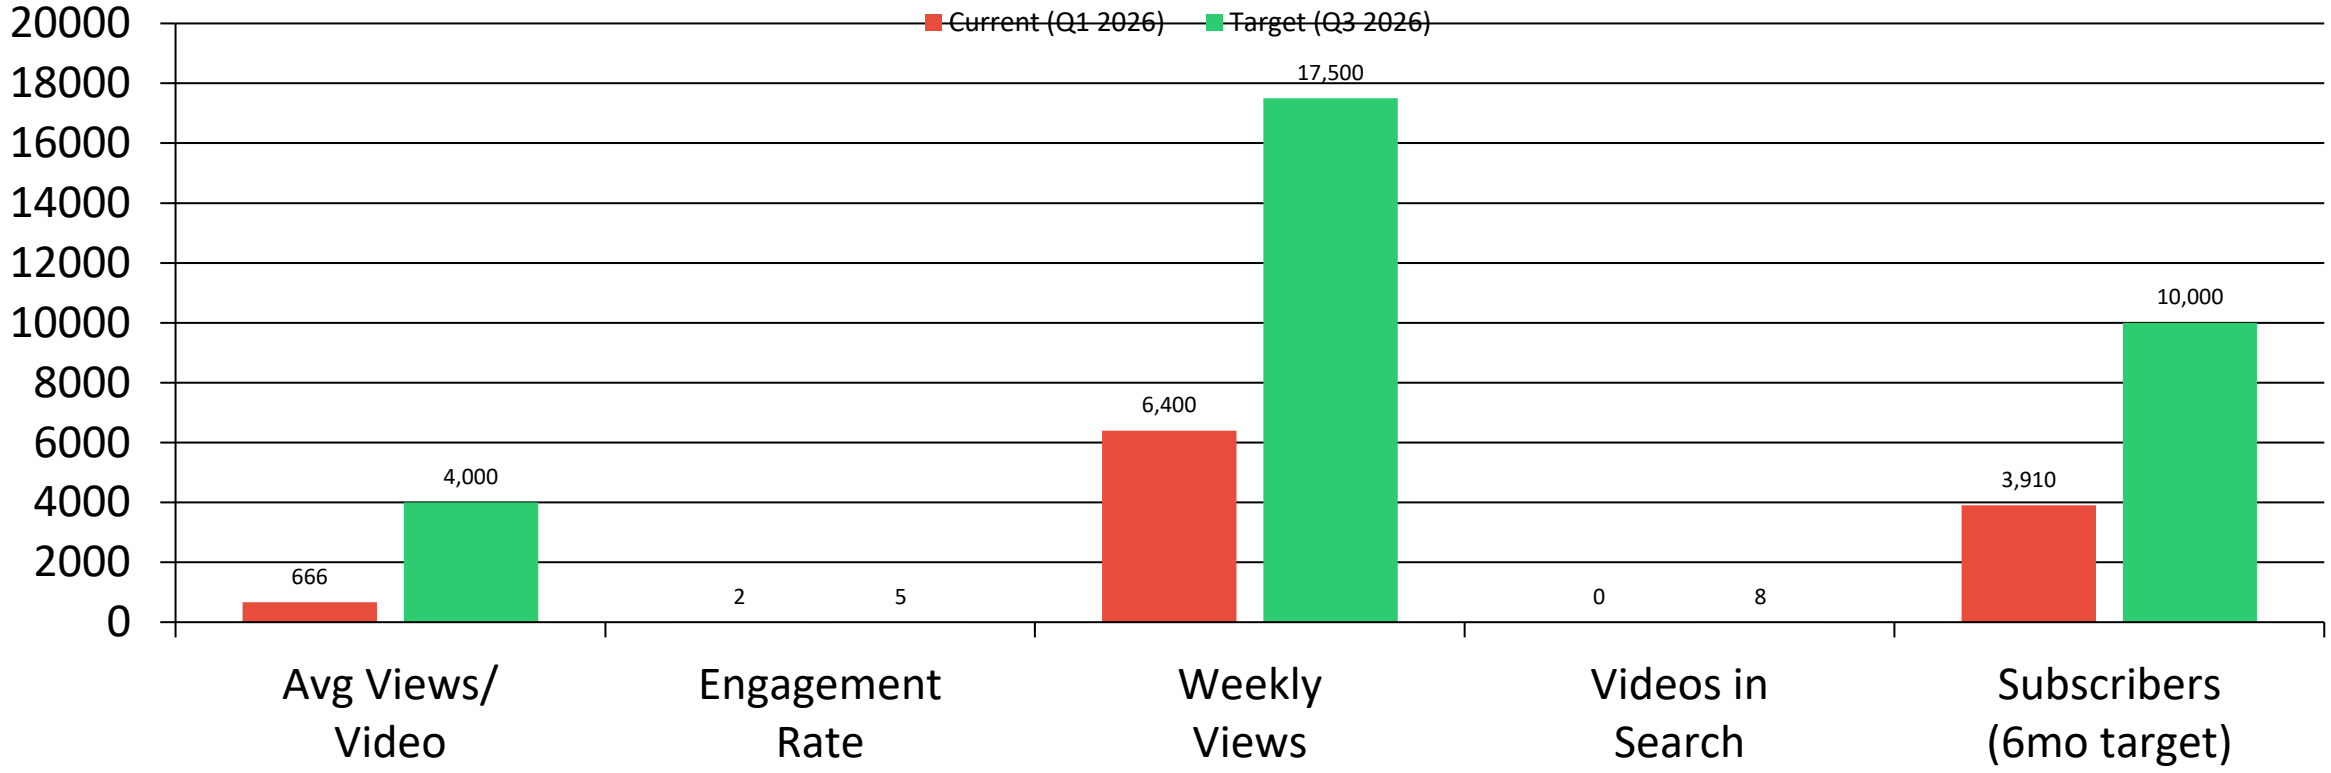
PROJECTED IMPACT



HOW WE GET THERE:

- Keyword-first titles on every video
- 4-5 videos/week (not 10)
- Unique tags per video
- Separate B2B content

NEXT STEPS

1. Start producing the 8 search-optimized videos from the roadmap
2. Cut upload frequency to 4-5 videos/week (quality over volume)
3. Rewrite tags on every new video to match its specific topic
4. Move B2B tax firm content to a separate channel or LinkedIn
5. Re-run this report weekly to track progress against benchmarks
